GROWING HOMEOPATHY

A Vision For All

Growing Homeopathy

Your help is needed to grow homeopathy so it may better serve other's healthcare needs.

Homeopathy is one of the most common and fastest growing forms of alternative medicine in the world today.

You, and others you know, have probably experienced the benefit of homeopathic treatment.

Homeopathy has tremendous potential in healthcare. It offers cure of chronic disease and is highly effective in treating first aid and acute conditions.

Homeopathy is effective because it treats the individual, not just the physical disease. Medicines are prepared in a way to bring out their innate healing potential and stimulate the body's own self-healing capacity.

Find out what is happening. It is a vision for all to benefit from!

Homeopathy

- *A well established, scientific, and effective system of natural medicine*
- *Helping families, children and people from all walks of life for over 200 years*
- *Medicines are safe, inexpensive, non-toxic, and FDA regulated*

A Vision for Homeopathy

Since the early 19th century homeopathic medical schools have been effective and viable throughout the world. Until the 1920's this also included the US.

To help meet the healthcare needs of our time the American Medical College of Homeopathy (AMCH) will open in 2010. AMCH will offer a four-year, full-time, 4300-hr medical and homeopathy curriculum.

It is an exciting time in homeopathy and you can be part of it!

Your support will facilitate the creation of AMCH and help it:

- Transform healthcare
- Meet the demand for homeopathic medicine
- Promote the profession of homeopathic medicine
- Provide quality medical training
- Provide free/low income clinics
